**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to measuring the complexity from a graph representation of a set of use-cases, classified in class 717, subclass 101.
  - II. Claims 9-15, drawn to measuring business-table complexity and normalizing the business table, classified in class 717, subclass 101.
  - III. Claims 16-21, drawn to measuring the complexity of nested object state transition diagrams, classified in class 717, subclass 101.
  - IV. Claim 22, drawn to a measuring complexity by way of a nested State Transition Diagram Logical Complexity Metric (STDLCM) through the state transition paths, classified in class 717, subclass 101.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I, II, III, and IV have separate utility as distinct methods for measuring complexity, respectively with a graph representation of a set of use-cases, a business-table, nested object state transition diagrams, or a nested State Transition Diagram Logical Complexity Metric (STDLCM) through the state transition paths. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search for either Group I, Group II, Group III, or Group IV are not required for any

respective counterpart group, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Samuel Dworetsky on June 14, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
